Tools	Office 365, Trello, Git, Active Directory, REST API basics, basic SQL
Frameworks	Agile, Scrum, CI/CD basics, UI/UX principles
Soft Skills	Communication, cross-functional collaboration, presentation, problem-solving, teamwork
Keywords	User stories, process improvement, SDLC, data accuracy, workflow optimisation, reporting

WORK EXPERIENCE

Accounting & Administration Intern | Cloudnova | Dec 2024 – Jun 2025

- Identified inefficiencies in accounts payable and receivable workflows and collaborated with finance and operations teams to implement process improvements, improving data accuracy and turnaround times.
- Produced documentation and reports supporting management decision-making; managed data integrity across financial systems.
- Coordinated scheduling and communications across multiple stakeholders, ensuring timely information flow.

IT Support Intern | Adaptiverse Pty Ltd | Nov 2023 – May 2024

- Elicited and documented end-user requirements to support internal web-based project development; communicated findings to the development team.
- Conducted UI/UX testing and logged defects, translating business needs into actionable technical feedback.
- Maintained system documentation for user accounts, workstations, and access controls.

IT Developer (Freelance) | Self-employed | Feb 2023 – Oct 2023

- Gathered and translated small business client requirements into digital solutions, managing scope, timelines, and delivery for 5+ projects.
- Built client relationships through proactive communication, resulting in 3 new client conversions via referral and outreach.

Sales Assistant | JD Sports, NSW | Apr 2023 – Jul 2025

- Analysed customer needs to deliver tailored product recommendations, contributing to a 20% uplift in weekly sales.
- Maintained inventory data accuracy and operational reporting across POS systems.

ACADEMIC PROJECTS & CASE COMPETITIONS

- Macquarie University IT Case Competition (2025) — Developed and presented a mobile navigation app business case to industry judges, covering market analysis, user needs, and technical feasibility.
- WSU Software Engineering Group Project (2023) — Led a team through full SDLC to deliver a task management application; responsible for sprint planning, requirements, and stakeholder updates.
